About

Motivated and detail-oriented Computer Science undergraduate with strong skills in Java, DSA, and full-stack web development. Passionate about building real-world applications and implementing AI-based features for enhanced user experience. I focus on creating projects that solve real-life problems and improve user convenience. Eager to learn, contribute, and grow in a challenging tech environment.

Education

IMS Engineering College

B.Tech in Computer Science, GPA: 7.2/10

Ghaziabad, Uttar Pradesh

October 2023 – July 2027

Projects

- **Code Buddy** — *React, TypeScript, Node.js, JWT, GitHub OAuth* — GitHub · *March 2026-April 2026*
 - Built Code Buddy, a full-stack AI code review platform that analyzes pasted code and GitHub repository files for bugs, performance issues, and security risks.
 - Implemented secure authentication using JWT and GitHub OAuth, enabling protected workflows for repository access, saved review history, and user-specific dashboards.
 - Integrated LLM-based review generation with a custom response parser and local code metrics engine to provide issue summaries, quality scores, complexity insights, and improved code output.
 - Designed and developed an end-to-end developer workflow with React + Monaco Editor frontend and Express + Prisma + MySQL backend, including review history, repository browsing, and insights tracking.
- **Online Parking System** — *HTML, CSS, JavaScript, PHP* — GitHub · *December 2025-January 2026*
 - Developed a full-stack Online Parking Management System enabling users to search, reserve, and pay for parking slots in real time.
 - Implemented slot availability tracking using live database updates to prevent double-booking.
 - Designed a user-friendly interface for booking, cancellations, and payment confirmation.
 - Integrated Google Maps / GPS location services to show nearby parking areas and navigation.
- **Admin-Hub** — *HTML, CSS, JavaScript, TypeScript* — GitHub · *october 2025*
 - Developed a production-level Admin Dashboard using React, HTML, CSS, and JavaScript with a responsive SaaS-style UI, including light/dark mode and collapsible sidebar navigation.
 - Implemented dashboard analytics, KPI cards, charts (Chart.js/Recharts), tables with sorting, pagination, and search, and dynamic data rendering via mock JSON/API.
 - Added search, filtering, and sorting functionality in tables for enhanced user management and order tracking.
 - Created reusable React components and modular code structure to ensure scalability, maintainability, and faster feature development.

Technical Skills

Programming Languages: C, JavaScript, Java, DSA with Java

Frontend: React, Vite, Tailwind CSS, HTML, CSS, Monaco Editor

Backend: Node.js, Express.js, REST APIs

Databases : MySQL, MongoDB, Prisma ORM

Authentication : JWT, GitHub OAuth

Tools & Frameworks: Git, GitHub, VS Code, Postman, IntelliJ

Core Subjects: DSA, Database Management, OOPs, Operating Systems, Computer Networks

Certificate

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate, Oracle University, Oct 2025

Deloitte Cyber Job Simulation — Forage — Aug 2025
